

Measures resistivity/resistance, temperature and humidity

- Measures resistivity: 10³-10¹² ohms/sq.
- Measures resistance: 10³-10¹² ohms
- Measures relative humidity: 10% to 90%RH
- Measures temperature: 0-37.7 (10v/100v test voltage range)
- Include probes:-- two 5 pound weight, 2.5"RTT, RTG disk probes

two 3" parallel surface resistivity probes

- LCD alpha-numeric scale-no LED'S
 - Rechargeable battery capability
 - Test mats, floor finishes, paints, wrist straps, smocks, foot wear, bags and coats
- It's easy to use and is of high quality and dependability. The meter also measures relative humidity and temperature, both of which affect electrical properties.

Features:

- Measures resistivity, temperature and humidity
 - 10³-10¹² ohms/sq test range
 - 10v/100v test ranges
 - Blow molded travel case
 - Light weight meter-15oz.
 - Alpha-numeric LCD scale
 - Automatic power shut off
 - Auto zeroing
 - Two 5 lb. disk probes and built in resistivity probes
 - One year warranty
 - Replaceable probes
 - 9 volt DC battery or 120 volt AC adapter
 - Cleanroom probes available
 - Concentric ring resistivity probe(optional)
-
