

**Regulatory Compliance Statement  
for  
Food Contact Articles**

**MYLAR® 800, 800CW**

**as manufactured by DuPont Hongji Films Foshan Co., Ltd. and/or  
DuPont Teijin Hongji Films Ningbo Co., Ltd. in China,**

**complies with the following FDA regulations subject to all other provisions of the regulations:**

**21 CFR 177.1630** -- Polyethylene Phthalate Polymers, sections (f), (g), (h), and (j). These regulations describe films that can safely be used in contact with all types of foods including alcoholic beverages that do not exceed 95% alcohol by volume. The films listed above can be used to contain foods during oven cooking at temperatures up to and above 250°F. The films listed above may be used for packaging, transporting, or holding alcoholic beverages that do not exceed 95% alcohol by volume.

The present review only refers to applicable food-contact regulations. Medical and pharmaceutical applications are not considered by these regulations. DuPont Teijin Films has established specific rules for medical and pharmaceutical end-uses. Please consult your DuPont Teijin Films representative for such applications.

The information and certifications apply only to the specific material designated herein as sold by DuPont Teijin Films and do not apply to use in any process or in combination with any other material. They are provided at the request of and without charge to our customers. We recommend you make your own determination on the suitability of the referenced product to your particular application. Since conditions of use are outside DuPont Teijin Films' control, DuPont Teijin Films makes no warranties, express or implied, and assumes no liability in connection with any use of this information.

**for DuPont Teijin Films US Limited Partnership**
