Cleanroom Ergo Tables

The Cleanroom Ergo Tables are available with either solid or perforated tops. These tables have been designed taking into account all cleanroom ergonomic factors. The table tops have a rounded front edge for operator comfort. The table legs are curved and inset to prevent operator knocking knees on the table. This attention to detail is carried through into the welding and finish of the product.

As is standard with all Palbam Class tables, all accessories such as : [bottom shelf](#) / [top shelf](#) / [drawer units](#) / [sliding keyboard holder/s](#) / [flat screen holder/s](#) / [cleanroom casters](#) can be connected to this versatile table range. (Not included with table).

Please note that to fit a drawer unit AND a keyboard holder to the same table, it has to be minimum 1100mm length.

Fabrication material : 304L stainless steel with electropolished finish & aluminum anodized connectors.
To view more table dimensions view the pdf link.
