COU2000EX Pro SMD Counter

COU2000EX Pro SMD parts counter is used to accurately measure the number of SMD materials in tape packaging, commonly known as SMT counting machine, inventory machine. It is an efficient auxiliary equipment for material management in SMT factories. It can realize functions such as label printing and barcode copying. SMtech COU2000EX Pro can detect empty tapes, and the data is more accurate.

Features :

1. High inventory accuracy and no technical errors.

2. Applicable to all SMD general tape packaging parts.

3. Both positive and negative directions can be counted, with repeat inspection function; the quantity can be pre-set and the machine can be stopped accurately.

4. Can be connected to printers and scanners to realize label printing and barcode copying.

5. Add type-c to realize the connection between the counter and the PC terminal and realize data interconnection.

6. Add wireless antenna to realize wifi connection and data transmission.

7. Simple operation, the unique anti-tape shedding design minimizes the damage to the tape.

8. The patented tilted operation panel allows the user to see the display screen and the parts in the strip at the same time.

Specification :

Model	COU2000EX Pro
Power	100-240V±10% AC 50hz 50W/2A
Count Range	-999999 to 999999pcs
Machine Size(L*W*H)	450*234.3*277mm
Packing size(L*W*H)	610*305*335mm
Weight	9.5kg(No include scanner and printer)
